Five-Year Student Survey Analysis

Instructional Program Review is a formative examination and evaluation of a given sequence of educational activities in the nature of an analytical “self-study”. At Del Mar College, programs, both credit and non-credit, are typically reviewed on a five-year cycle. As a part of the program review process, the Office of Institutional Research annually conducts a student survey during the fall semester. Surveys are administered during October to a sample of students currently enrolled in the disciplines undergoing a program review. The faculty commit a portion of their class time to administer the survey, and chairpersons have annually helped to redesign the survey instrument and select an appropriate sample for each discipline. The sample is checked to ensure appropriate representation of freshman- and sophomore-level courses, day and evening classes, and full-time and part-time instructors. The stratified sample size varies according to the size of enrollment in the program area. For programs with smaller enrollments (usually fewer than 100), all students are surveyed. The results of the student surveys are analyzed and distributed to the respective program review committees, and then compiled into a combined annual report that is printed and published on the Web for general reference.

Students in the following disciplines were surveyed during the 2008-09 Program Review cycle:

- Accounting, Banking and Finance
- Arts
- Business and Economics
- Chemical Laboratory Technology
- Cosmetology
- Diesel Applied Technology
- Dental Assisting
- Hospitality Management
- Industrial Education
- Languages
- Music
- Process Technology
- Political Science
- Welding Applied Technology

Students in the following disciplines were surveyed during the 2009-10 Program Review cycle:

- Auto Body Applied Technology
- Aviation Maintenance
- Court Reporting
- Diagnostic Medical Sonography
- Emergency Medical Services
- English
- Geography
- Human Services
- Industrial Machining Applied Technology
- Law Enforcement
- Medical Lab Technology
- Military Science (not reviewed)

Students in the following disciplines were surveyed during the 2010-11 Program Review cycle:

- Architectural/Drafting Technology
- American Sign Language and Interpreting
- Business Technology
- Computer Science and Info Technology
- Dental Hygiene
- Freshman Seminar
- Health Information Technology
- Humanities
- Nondestructive Testing
- Occupational Safety and Health Technology
- Philosophy
- Radiologic Technology
- Respiratory Therapy
- Sociology and Social Work
- Surgical Technology

- ESOL
- Geology
- Kinesiology
- Management Development
- Nuclear Medicine Technology (new)
- Pharmacy Technology (new)
- Psychology
- Speech
- Sound Recording Technology (new, not reviewed)

Students in the following programs under review for 2012-13 were surveyed:

- Automotive Applied Technology
- Biotechnology (review in 2014-15)
- Chemistry
- Child Development/Early Childhood
- Criminal Justice
- Drama
- Education
- Fire Science
- History
- Legal Professions
- Mathematics
- Nurse Education
- Occupational Therapy Assistant
- Physical Therapist Assistant
- Reading

Response Rate

- Students from 412 on-campus and 84 on-line classes were invited to participate in the survey during this five-year cycle. A combined classroom and online total of 5,852 surveys were analyzed.
- Of the 7,896 students surveyed in class, 5,268 (67%) completed and returned the surveys. The highest (74%) annual rate of response for classroom surveys occurred in fall 2011 and the lowest (59%) was in fall 2008.

- The first survey administered on the Internet was in 2007. The response rate for fall 2007 was 64 percent, yet only 27 percent in fall 2008 and only 15 percent in fall 2012. The highest response rate for online surveys was in fall 2009 (38%). Overall, during the last five years, 584 students out of 2,139 (27%) participated in the online survey.

Overall Quality of Education

- Overall, 92 percent of the students rate the quality of the education that they receive from Del Mar College as good or excellent.
- If students were to start their education process over, 80 percent would choose Del Mar College again, and 94 percent would recommend the College to a friend.

Quality of Programs

- Concerning the subject of the class in which students were surveyed, 91 percent rated the quality of education as good or excellent, and 89 percent would recommend the class to a friend.
- Eighty-seven percent of students rated the amount of knowledge/learning gained in the subject as good or excellent.
- When asked about the instructors in the subject of the class in which they were being surveyed, 92 percent agreed that their teachers were attentive and concerned, and 88 percent of the students surveyed believed that what they were learning would help them to succeed.

Quality of Advising

- Over one-half of the students (60 %) indicated that they had worked out an educational/degree plan for their major.
- Almost all of the students who required advising were advised, with 97 percent of students in English, 96 percent in math, and 97 percent in their respective majors.
- Of the students who required placement 75 percent rated the quality of advising as good or excellent in English, and 65 percent in math. The majority of students (78%) were satisfied with advising in their major.

Availability of Classes

- Most of the students (89 %) agreed that the classes for the subject they were surveyed in are scheduled at convenient times. Eighty-four percent agreed that the required courses for that subject are offered when needed but only 78 percent of the students agreed that required courses for other academic areas are offered when needed.

- Consistently through the years, students have been most interested in afternoon (1:00 pm–5:00 pm) classes, with 68 percent agreeable to taking a class at this time. Another one-half (53%) of students expressed interest in taking the class between 5:30 pm and 6:50 pm and 43 percent interested in taking a class between 7:00 pm and 8:20 pm.
- A minority expressed interest in taking early morning (23%), late evening (25%) and weekend (27%) classes.
- Though distance learning courses continue to grow in popularity the percent of students willing to take their classes online fluctuated between 30 percent and 40 percent during this five-year cycle.

Abilities Improvement

- Four out of five students believe they had improvement in their listening skills (84%), critical thinking/problem solving/reasoning skills (83%), and writing skills (80%). Over three-fourths believe their reading comprehension (79%) and oral communications (79%) have improved, and another 78 percent noted improvement in their use of technology.
- Over two-thirds (69%) of the students who rated the level of improvement, believe that their math skills had improvement. Overall, only eight percent indicated they had no improvement in math skills as a result of taking a class in their program area.

Quality of Services

Students were asked to rate the level of importance of and satisfaction with the quality of services in 20 different areas using a one-to-four scale, with one being lowest and four being highest. Students to whom the statement did not apply were not included when calculating the mean levels of importance and satisfaction. Generally, a “Does not apply” response indicates that a student did not have a personal experience with the item in question in order to rate the level of satisfaction with it.

- Analysis of five-year average percent positive responses showed that 15 of the 20 survey items were rated both important and satisfactory by 9 out of 10 students. Teaching methods were important to 98 percent of the students and 94 percent expressed satisfaction with the teaching methods in their program area. Development of career skills and knowledge was important to 96 percent of the students and 95 percent were satisfied with the result. Though only 82 percent stated that condition and appearance of the building was important to them, 93 percent said they were satisfied with the building their class was in.
- The percentage of “Does not apply” responses varied greatly between 20 items from just one percent regarding teaching methods to over 38 percent regarding job and career services. Analysis of not applicable satisfaction responses showed that over the past five years only ten percent of the students did not use the library, while significantly more students did not use the computer lab (22%), writing center (26%), math lab (35%) or reading lab (40%).

- During this five-year cycle, on average, students placed the highest mean level of **importance** on career skills development (3.67), teaching methods (3.60), availability of courses (3.50), up-to-date equipment (3.50), availability of equipment and technology (3.48), access to PCs and computer labs (3.47), and availability of program adviser (3.47). The lowest importance was consistently placed on reading lab (3.21) and the condition and appearance of buildings (3.22).
- Consistently through the years students expressed the highest mean level of **satisfaction** with development of career skills (3.44), library resources (3.43), teaching methods (3.42) and access to PCs and computer labs (3.40). Students were least satisfied with job placement services (3.19), availability of courses (3.22), availability of program adviser (3.22), and availability and helpfulness of tutors (3.19).
- The means for all items during this five-year cycle were relatively high, with the lowest being 3.21 for importance and 3.19 for satisfaction, illustrating general overall student satisfaction with the quality and offerings of programs and services. Although the majority of students ranked the importance of most statements higher than they ranked their level of satisfaction, it is important to note that this difference is normal and expected and is a standard feature of this survey methodology. The key to proper analysis of the survey results—to be able to target critical challenges—is to identify areas in which the level of importance is relatively high and the level of satisfaction is relatively low. A graph on page 26 shows the mean difference between the respondents' ratings of importance and satisfaction with services.
- Students expressed the largest five-year average gap between the levels of importance and satisfaction (-0.28) for the availability of courses. The availability of a program adviser had the second largest gap (-0.25) during the five-year cycle. It is important to note the widening of gap between the levels of importance and satisfaction for career skills development from -0.19 in fall 2008 to -0.28 in fall 2012, resulting in the third largest five-year average gap (-0.23). However, these were the only areas with the gap larger than -0.20. Seven items had an average gap of less than -0.10 and three items had a positive gap.
- The items on which the level of satisfaction exceeded the level of importance every year were the condition and appearance of buildings, reading lab, and English Writing Center resulting in a five-year average gap of +0.13, +0.10, and +0.09, respectively.

Factors Considered when Choosing Del Mar College

- Students listed the following as major reasons for attending Del Mar College: affordable tuition and fees (69 %), convenient location (59 %), and type of courses offered (59%). While availability of financial aid was a major reason to only 44 percent of the students in fall 2008, it rose to 50 percent by fall 2010 and remained at 50 percent in fall 2012.
- Relatively large proportions of students stated that the following reasons were not a factor in choosing Del Mar College: the fact that friends attend Del Mar College (65%), the ability to live with parents or relatives (54%).

Student Employment Status and Educational Intent

- About two thirds of the students surveyed during this five-year cycle (64%) indicated that they are employed, with 26 percent employed full-time and 38 percent employed part-time. Of those who were not employed three out of five students (59%) were not seeking employment.
- On average, 53 percent of the students listed a short-range goal of receiving a two-year degree; 48 percent indicated a long-range goal of receiving a four-year degree and another 31 percent intended to pursue graduate studies.
- On average, the most important reason for attending Del Mar College is to prepare to transfer to a four-year college (42%). Gaining skills to enter a new occupation is the most important reason for attending the College for another one-third (33%) of students. Eighty percent of the students surveyed planned on graduating from Del Mar College—69 percent with an associate degree, and 11 percent with a certificate.
- Seventy-one percent of the students planned to transfer, with 45 percent listing Texas A&M University-Corpus Christi as their transfer destination, and one out of five students (20%) undecided as to their transfer destination at the time the survey was administered.

Use of Results

Since all instructional programs are represented in the five-year combined total and many of the questions on this student survey administered for program review solicit responses of a broad nature that relate to all disciplines, much of the data can well be used for purposes beyond program review, including the assessment of student learning outcomes and student support services objectives.

However, the year-to-year survey results should not be used in a trend analysis of College-wide changes in students' perceptions, opinions, or intentions over time, as these results are a reflection of student opinions from the specific combinations of programs surveyed that year (for example, in years when a higher proportion of the sample included career and technical courses - such as 2010/11 - a lower proportion of students (29% vs. 5-year average 42%) indicated that they plan to transfer).
