Geopolitical issues increase volatility

Geopolitical issues have intensified at month end and are dominating the markets as well as the headlines.

The global markets have been struggling as the Russian invasion of Ukraine intensifies, but the impact is clearly bullish for US Treasuries as investors flee to safety. The equity markets have been whipsawed unmercifully, but the bond markets are also not immune as we watch the 10 year's volatility. The US dollar and the Japanese yen are considered the best safe havens for assets with such threats so are reacting to hourly news.

The news of Russian nuclear forces moving to high alert has moved the markets to its highest volatility yet. That modified investors views as they realized that the war will inevitably have an impact on the US economy.

International coordinated sanctions are mounting. They are designed to impose immediate costs and impose future restrictions on Russian economic activity. Isolating Russia from international finance and commerce should degrade Putin's ability to project power. Even traditionally neutral countries are participating in the sanctions from air space control to BP's divestment of its 20% stake in the Russian controlled Rosneft oil producer.

Russian forces invade Ukraine

Inflation remains on the move

With rising geopolitical risks, central banks are working together as they weigh the trade-off between growth and inflation and its impact to each country's GDP. If downside risks to the growth outlook prevail, slower growth should slow inflation. The impact of oil and natural gas supply in Europe is critical.

A clear, durable inflation problem and continuing strong demand for labor and financial instability probably does not favor an overly aggressive start to the removal of the policy accommodation or faster rate hikes. Traders are betting there's a 100% chance that the Fed raises rates by at least a quarter of a percentage point. Geo-politics may move a 0.50% hike off the table indefinitely.

Of major importance are commodity prices. Oil and natural gas, which are key to Russia exports, have risen significantly. Crude oil prices are at 2014 highs – up 22% already in 2022. Other key commodities like aluminum (up 3%) and the wheat and corn from Ukraine, which is a major EU breadbasket, are also soaring.

Core personal consumption expenditures (PCE) index, the Fed's preferred inflation gauge, rose by 5.2% YOY. That's the index's biggest one-year jump since April 1983. And the consumer price index (CPI) surged by 7.5% on a year-over-year basis. That marked the sharpest gain since 1982. Consumers keep consuming but are paying more.

An old saying in commodity markets is that "the cure for high prices is high prices." Prices don't rise in perpetuity. Ultimately, they reach price intolerance, which is followed closely by a drop in demand. This demand destruction exerts its natural gravitational pull on inflation.

Surging inflation

Values reflect the year-over-year % changes in the Consumer Price Index.

The Fed's Planned Taper has Its Uplifting Effect

- The US Treasury is global money's safe-haven and as the war intensified the volatility has increased.
- Each of the T-Notes has fluctuated but are generally down from the beginning of the month when Ukraine was not the focus and markets centered on the Fed increasing rates.
- As sanctions are applied and settlement options narrow money has flown into Treasuries, decreasing yields.
- Currently, the markets are pricing in a 0.25% increase to the Fed Funds rate in March.

Notes: ¹Patterson & Associates has assisted in the preparation of this consolidated quarterly report, with additional input provided by Del Mar College. **WAM** represents weighted average maturity.
²Change in Market Value is required data, but will primarily reflect the receipt and expenditure of the College's funds from quarter to quarter.

Portfolio Overview

As of February 28, 2022

- P&A constantly reviews your portfolio for optimal asset allocation and a controlled average maturity because a diversified portfolio can better adjust to volatile market conditions. Where extensions can be made it is important to make them to find any available safe value in the markets.
- The graphs below show asset allocations by market sector and by maturity in your portfolio. With the current yield curve, commercial paper is providing the greatest value for maturities less than 1 year. We continue to see value in the extension of the portfolio into the 3-5 year space, cash flows permitting.
- The non-cash portion of your portfolio is yielding 0.46%.
